MAXIMIZE OPERATOR THROUGHPUT
MINIMIZE TOTAL INVESTMENT
CONSISTENTLY MEASURE OPERATOR COMPETENCY

As either an integral part of Immersive Technologies' Complete and Scalable Solution, or stand alone, Instructor Led Training provides an efficient, customized and cost effective approach to operator training.

Instructor Led Training

Utilize your training resources for maximum effect

What is Instructor Led Training?

Our Instructor Led Training solutions are based on best practices and customized to your site's requirements. This approach allows us to work with your subject matter experts to ensure that all legislative and standard operating procedures are captured accurately. This creates an effective and consistent learning environment which allows students to increase knowledge and skillset.

Instructor Led Training Benefits

- Deliver highly customized classroom based training to address site specific objectives
- Structured learning environment with instructor support material to deliver consistent group training
- Student guides and reference material allowing the student to continue learning outside the classroom
- Interactive exercises utilizing hand held devices to increase student engagement
- Quantify knowledge gaps and competencies for effective targeted and refresher training
- Feedback mechanisms to optimize learning transfer

Blended Learning Model

Through our holistic approach to equipment operator development, Immersive Technologies provides our customers with a training model that ensures high levels of staff readiness and operational improvement, while taking advantage of a range of technologies to ensure the most cost effective solution. We do this through blending eLearning, Instructor Led Training, Medium and High Fidelity Simulators within a curriculum to meet your specific needs.

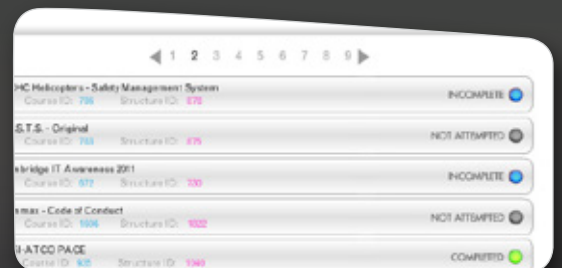

This ensures the lowest cost training tool is applied at all times without compromising learning or assessment outcomes.
